

ECLIPSE

RESTING CABINETS

MADE IN FRANCE

We provide quality
professional equipment
and services to artisan bakeries.

ECLIPSE RANGE

The Eclipse range are resting cabinets that can be loaded and unloaded manually.

The use of an resting cabinet ensures good relaxation of the dough pieces after the dividing stage, which favors elongation during moulding.

Ergonomic, compact and with a large storage capacity, Eclipse resting cabinets can be easily integrated into all types of bakery configurations.

KNOW-HOW

70 years at your side

With 70 years' experience, Bertrand Puma has achieved its high level of expertise thanks to unique know-how in the design of equipment for bakeries and patisseries, and the development of Made in France products that are ever more reliable and efficient.

EASY TO USE AND INTEGRATE

VIDEO
DISCOVER
THE ECLIPSE
RANGE

The compact dimensions of Eclipse resting cabinets, with their large loading capacity, enable them to fit into any bakehouse configuration, optimizing work space.

Ergonomic research on this equipment has led to a design that ensures a good working position, for easy, comfortable use.

ROBUST CONSTRUCTION

Durable and resistant, Eclipse features a self-supporting **epoxy-painted steel** frame. The frame is mounted on **4 swivel wheels**, with front brakes, for easy movement.

LARGE CAPACITY

Store between **256 and 400 dough pieces** (350 g), depending on the model, while maintaining a **small footprint** (1.4 m² for the smallest model).

EASY TO USE

Manual loading/unloading is quick and easy, and step-by-step advance of the gutters is ensured by **two push-buttons** on the right and left. The **retractable rounding table** at the front of the machine allows you to finish the moulding process by hand if required.

ERGONOMICS & COMFORT

Each model has an **ergonomic working height**.

The **top plate** is designed to **accommodate a moulder** to further optimize workspace and reduce movement.

IMPECCABLE HYGIENE

The gutters are made of **food-grade synthetic felt** (monofilament optional) and are **easy to dismantle**.

A **safe maintenance cycle with timed stop in front of a germicidal lamp**, as well as ventilation for drying, is available as an option (this maintenance kit can be retrofitted).

ECLIPSE STENTOR

THE ALLY OF INTENSIVE PRODUCTION

Specially designed for intensive, high-speed production, the **Eclipse Stentor** model lives up to every expectation.

Sturdy par excellence, Eclipse Stentor is prepared for all eventualities: **reinforced at the bottom**, its treated structure makes it more resistant to corrosion.

The interface is also more resistant to shocks, thanks to its **metal cover** and the integration of **flush-mounted buttons**.

The **rounding table is made of ertalon**, a tough, rigid material with excellent wear resistance.

For even greater ergonomics, a **bar** has been added to the front panel to facilitate machine movement.

A **maintenance hatch** is also integrated at the rear for **easy cleaning**.

TECHNICAL DATA

RANGE STENTOR

A reinforced design and an ever more robust choice of materials and accessories for intensive, all-terrain use.

SAFETY

All our equipment is certified by an external, independent organization.

ECLIPSE BASIC

Ultra-compact models, with a single push-button on the left, and no flour container or rounding table.
